

# Year 5 Newsletter

9<sup>th</sup> May 2025

*Dear Parents*

*This week in maths the children have begun to learn about angles, beginning with knowing that there are 90 degrees in a quarter turn, 180 degrees in a half turn, 270 degrees in a three-quarter turn and 360 degrees in a full turn. They then learnt to identify acute, obtuse, reflex and right angles, before learning how to use a protractor to measure angles. In English, the children wrote a diary entry in the form of a ship's log. In RE, we found out more about how Muslims pray – Salah – and compared Muslim prayer with Christian prayer.*

## *Geography Day at The Malling School*

*We had a super time at The Malling School on Tuesday. The teacher, Mr Ryder, is such an enthusiastic man and as well as learning lots and having fun, it was a great way for the children to experience what life is really like at secondary school.*

### *DT Day - Tuesday 13<sup>th</sup> May*

*The children will be making the musical instruments that they designed on **Tuesday next week**, so they will need to make sure that they bring in everything they need on Monday or Tuesday please. Since there will be lots of glueing and painting involved, it could be a bit messy, so the children are welcome to wear their own clothes that day - obviously something old and scruffy!*

Home Learning:

- Gathering materials for DT
- New spellings to learn for next Friday
- Times tables
- Reading daily

Best wishes,

Louise Grinstead
