Term 1 Week 4

A snapshot of our week

## Maths:

This week, we have been learning about addition, subtraction and multiplication. The children have solved fluency, problem-solving and reasoning questions. We have also been working on solving arithmetic questions. We also recapped how to multiply and divide by 10, 100 & 1000.

## English:

After reading another chapter of our class book, I asked the children what the characters in the book could do to alleviate their boredom. They had lots of ideas. When I showed them a picture of a tyre and some rope, they realised I was suggesting making a rope-swing. We all went outside and the children made a rope-swing – it took a few goes! When done, the children all had a go, before we went back into the classroom to write a set of instructions. Later in the week, the children wrote a descriptive recount.

## Science:

In Science, the children learnt about refraction. They worked in small groups to carry out their investigation.

## Italian:

The children revised the verb 'to have' and built sentences using animals and adjectives – 'I have a black cat'.

## History:

We continued learning about World War II. This week, we recapped some of the important vocabulary. We then learnt about hyperinflation, which angered many German citizens, as their money became worthless.

## PE:

We continued learning how to pass the ball in tag rugby, whilst evading the defenders through side-stepping and varying the speed. The children also practised scoring tries.

## World War II day:

We are having a WWII day on Tuesday 5<sup>th</sup> December. The children are invited to dress up. We are taking part in a Zoom lesson, supplied live by the National Holocaust Centre. In order to fund this session, we are going to be holding a cake sale. Further details will be available soon.
